

GERBER SPORTSMEN'S KNIVES
A Portfolio Of Outdoor Legends

Gerber Folding Knives.
On top: the Magnum Folding Hunter. Below, left to right: Folding Sportsman IId Stag, Folding Sportsman III, Folding Sportsman I. Also shown: top grain molded leather belt scabbard.

Legendary Craftsmanship GERBER FOLDING KNIVES

Folding Knives For Sportsmen: Six elegant workhorses: four Folding Sportsman knives, the Classic and the Magnum Folding Hunter. Handles of rare style and substance: solid, polished brass, with the warmth of tropical hardwood inlays. Blades are 440-C surgical stainless steel (Rockwell C57-59), ground to an incomparable sharpness by hand. Each blade locks open with authority.

Stag Folding Hunters: Once again, blades are surgical quality 440-C stainless steel. Handles are crafted from solid brass, with a distinctive extra touch: rare natural Sambar staghorn from India, which provides a non-slip surface and makes every knife an original.

Scabbards: All Gerber scabbards are top grain leather, handcrafted in our own leather shop.

Folding Sportsmen's Knives

The Classic: Single 2 3/8" drop-point blade. Length open, 6 1/4", closed, 3 1/2". Blade thickness, .100". Scabbard optional.

Folding Sportsman I: Single, 2 3/8" drop-point blade. Length open, 6 1/4", closed 3 1/2". Blade thickness, .100". Scabbard optional.

Folding Sportsman II: Single, 3 1/2" trailing point blade. Length open, 8", closed, 4 1/2". Blade thickness, .100". Scabbard optional.

Folding Sportsman IIId: Same as Folding Sportsman II but with a drop-point blade.

Folding Sportsman III: Single, 4" trailing point blade. Length open, 9 1/4", closed, 5". Blade thickness, .125". Includes a leather belt scabbard.

Magnum Folding Hunter: Single 3 1/4" drop-point blade. Length open, 7 3/4", closed, 4 1/2". Blade thickness, .125". Leather scabbard included.

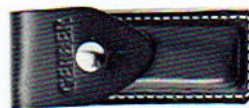

Stag Folding Hunters

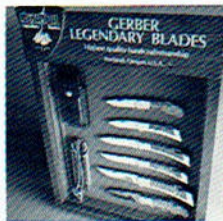

Folding Sportsman I Stag: Single, 2 3/8" drop-point blade. Length open, 6 1/4", closed 3 1/2". Blade thickness, .100". Leather scabbard included.

Folding Sportsman II Stag: Single, 3 1/2" trailing point blade. Length open, 8", closed 4 1/2". Blade thickness, .100". Also available with a drop-point blade, FS IId Stag. Leather scabbard included.

Scabbard for the Folding Sportsman Knives: Carefully heat-molded for good looks and shape retention. Each hand-sewn with bonded nylon thread for maximum life. Edges finished and sealed by hand for smoothness and durability. Top grain leather. Rich brown tones.

Folding Knives Display Case: Holds 6 brass folding knives, 5" sharpening steel and leather scabbard. Dimensions: 14 1/4" wide, 20" high, 2" deep. Available in a glass-covered, above-the-counter model, or an open, undercounter model. Displays consist of a vacuum-molded panel inside a handsome frame with the look of walnut.

Joseph R. (Pete) Gerber, Jr., President

How We Build Our Legends.

"We have yet to find a short-cut in the pursuit of genuine excellence. And so, to our comptroller's occasional dismay, we continue making liberal use of an old-fashioned but highly effective device: the human hand.

From first casting through final inspection, Gerber craftsmen employ a kind of fanatical zeal, turning out knives that are as close to custom-made as a production knife can hope to be.

We hope you'll find our patient approach to be a refreshing change of pace in a world that, all too often, has forsaken quality for the sake of quantity."

Pete Gerber

*The Gerber LSTs.
Top to bottom: the Classic with Maroon handle; the Classic with Ivory handle; the Folding Sportsman I, also with Ivory handle.*

*3 elegant variations on the Paul Knife.
Top to bottom: the 2PM, Micarta handle; the 2PW, hardwood handle; the 2P, stainless steel handle. Also shown: top grain leather belt scabbard.*

1½ Ounces Of Pure Legend THE LST FOLDING KNIFE

“LST” stands for Light, Smooth and Tough. The design incorporates the best features of our popular Folding Sportsman I and Classic knives with these added benefits: **Light**, because the entire knife weighs 1½ ounces. **Smooth**, thanks to oil-impregnated brass bushings that allow the blade to rotate easily. **Tough**, because of durable Micarta side plates and 440-C surgical stainless steel blades, hardened to a Rockwell rating of 57-59C. Small enough to be a pocket knife, rugged enough to be a valuable companion on backpacking trips. Great for hunting, camping, boating and all outdoor activities.

LST Classic with Maroon Handle: 2¾" drop point blade. Length open, 6⅞"; closed, 3½". Blade thickness, .100". Handy lanyard hole.

LST Folding Sportsman I with Maroon Handle: 2¾" drop-point blade. Length open, 6⅞", closed, 3½". Blade thickness, .100".

LST Classic With Ivory Handle: 2¾" drop point blade. Length open, 6⅞"; closed, 3½". Blade thickness, .100". Handy lanyard hole.

LST Folding Sportsman I with Ivory Handle: 2¾" drop-point blade. Length open, 6⅞", closed, 3½". Blade thickness, .100".

The LST Display: Each LST fits snugly into a vacuum-molded panel. Dimensions: 10¾" wide, 11¼" high. For use above or below counter.

A Legend In Precision THE PAUL KNIFE

It's unlike anything you've ever seen or handled. A folding knife built like a fine watch, with precision well beyond that of conventional knifemaking. Designed by aerospace engineer Paul Poehlmann. Components are high carbon, hardened stainless steel, the kind used in building aircraft. Our patented axial locking mechanism lets you open and close the knife without ever touching the blade.

Model 2P Stainless Steel: 2½" drop-point blade. Brushed stainless steel handle. Length open, 6"; closed, 3½". Blade thickness, .115".

Deluxe Model 2PW: 2½" drop-point blade. Inlays of rare hardwood. Length open, 6"; closed, 3½". Blade thickness, .115".

Deluxe Model 2PM: 2½" drop-point blade. Micarta inlays. Length open, 6"; closed, 3½". Blade thickness, .115".

Scabbard for the Paul Knife is available as an optional accessory. (Suede leather pouch is included with each Paul Knife)

Opening The Paul Knife

Step 1: While holding the handle, press the button firmly with your thumb and forefinger, and rotate the blade outward.

Step 2: Continue rotating the blade clockwise and upward.

Step 3: Release the button and the blade locks into place with a solid, satisfying click.

The Silver Knights.

Upper left: 250B, Mother-of-Pearl handle. Lower left: 200A, handle of unique Abalone shell. Right, top to bottom: 250B, wood handle; 250A, handle of checkered ABS; 200SS, handle of stainless steel.

Pocket-Sized Legends
THE SILVER KNIGHT

These knives are compact enough to fit in your pocket, tough enough for the outdoors, and handsome enough for the executive suite. Blades: a unique surgical stainless steel, heat treated to achieve a Rockwell hardness of C58-60. Cases are of satin-finished stainless steel, with handle inlays of tropical hardwood, Australian Mother-of-Pearl, green checkered ABS (a rugged synthetic), and natural Abalone shell.

Our Newest Models

200A Abalone: Single 2" drop-point blade, with positive lock. Length open, 4¼"; closed, 2½". Blade thickness, .073". Distinctively crafted of natural Abalone shell with no two handles exactly the same.

200SS: Single 2" drop-point blade. Length open, 4¼"; closed, 2½". Blade thickness, .073". Handy lanyard hole. All stainless steel. Brushed finish sideplates are ideal for engraving or etching of names, logos, etc.

250SS: Single 2½" drop-point blade. Length open, 4¼"; closed, 2½". Blade thickness, .095". Handy lanyard hole. All stainless steel. Brushed finish sideplates are ideal for engraving or etching of names, logos, etc.

250A Checkered: Single 2½" drop-point blade with positive lock, green checkered ABS inlays and GLB insignia. Length open, 5½"; closed, 3¼". Blade thickness, .095".

300A Checkered: Single 3" drop-point blade with positive lock, green checkered ABS inlays and GLB insignia. Length open, 6¾"; closed, 3¾". Blade thickness, .095".

300A Wood: Single 3" drop-point blade with positive lock, tropical hardwood handle inlays. Length open, 6¾"; closed, 3¾". Blade thickness, .095".

200A Wood: Single 2" drop-point blade with positive lock, tropical hardwood handle inlays. Length open, 4¼"; closed, 2½". Blade thickness, .073".

200A Pearl: Single 2" drop-point blade with positive lock, Australian Mother-of-Pearl handle inlays. Length open, 4¼"; closed, 2½". Blade thickness, .073".

250A Wood: Single 2½" drop-point blade with positive lock, tropical hardwood handle inlays. Length open, 5½"; closed, 3¼". Blade thickness, .095".

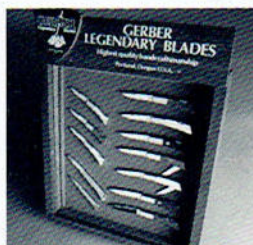

250A Pearl: Single 2½" drop-point blade with positive lock, Australian Mother-of-Pearl handle inlays. Length open, 5½"; closed, 3¼". Blade thickness, .095".

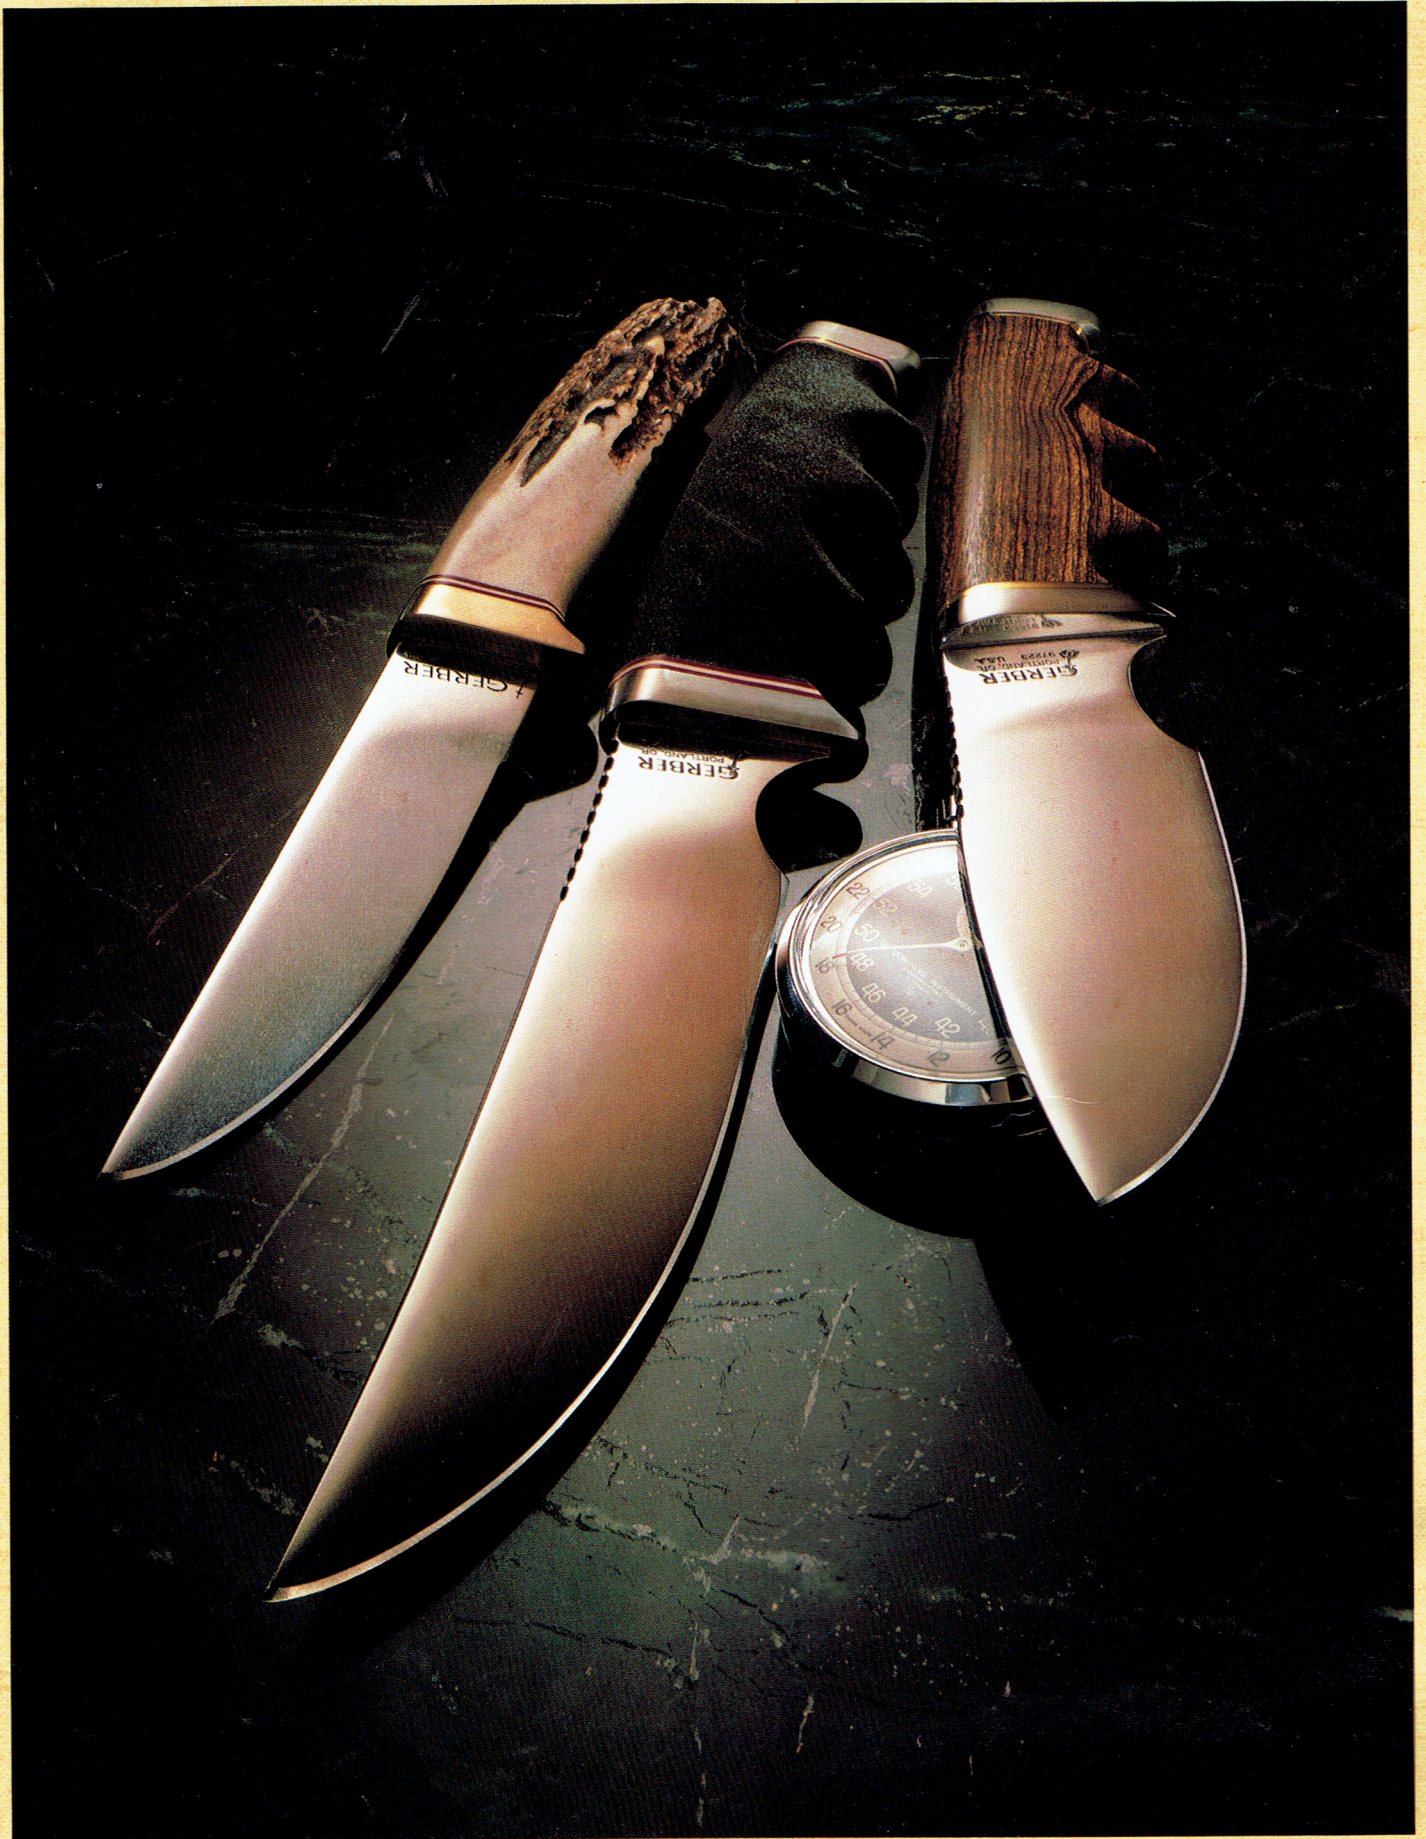

250B Wood: Two blades. 2½" drop-point and 1½" sheep's foot blades. Tropical hardwood handle inlays. Length (with only the longer blade open), 5½"; closed, 3¼". Blade thicknesses, .095" and .060".

250B Pearl: Two blades. 2½" drop-point and 1½" sheep's foot blades. Australian Mother-of-Pearl handle inlays. Length (with only the longer blade open), 5½"; closed, 3¼". Blade thicknesses, .095" and .060".

The Silver Knight Display Case: A distinctive molded counter display that holds all 12 Silver Knights. Dimensions: 19½" wide, 20" high, 2¼" deep.

*Our fixed blade legends.

Our Fixed Blade Legends

PRESENTATION, CUSHIONGRIP AND CUSTOM STAG KNIVES

The Presentation Series: These, we believe, are the finest outdoor knives that technology and the human hand can produce. Surgical 440-C stainless steel blades (Rockwell C57-59). Handles are hand-carved from solid, South American hardwood, for a comfortable, controlled grip.

Cushiongrip Knives: The same superb design as the Presentation series, but with resilient handles of DuPont Hypalon. A grip you'll have to squeeze to believe.

Custom Stag Hunters: High speed tool steel blades, tough enough to cut other steels (Rockwell C60-62). Handles fitted with rare natural Sambar stag from India. Each beautifully unique.

Scabbards: A hand-crafted, custom-fitted leather scabbard is included with every Presentation, Cushiongrip and Custom Stag knife.

Presentation Series

400S: 4" skinning blade. Overall length, 9". Blade thickness, .156".

425S: 4 1/4" hunting/camping blade. Overall length, 9 1/4". Blade thickness, .156".

450S: 4 1/2" fish and game blade. Overall length, 9 1/2". Blade thickness, .156".

475S: 4 3/4" big game blade. Overall length, 9 3/4". Blade thickness, .187".

525S: 5 1/4" heavy duty hunting blade. Overall length, 10 1/2". Blade thickness, .187".

Cushiongrip Knives

400CG: 4" skinning blade. Overall length, 9". Blade thickness, .156".

425CG: 4 1/4" hunting/camping blade. Overall length, 9 1/4". Blade thickness, .156".

450CG: 4 1/2" fish and game blade. Overall length, 9 1/2". Blade thickness, .156".

475CG: 4 3/4" big game blade. Overall length, 9 3/4". Blade thickness, .187".

525CG: 5 1/4" heavy duty hunting blade. Overall length, 10 1/2". Blade thickness, .187".

Custom Stag Hunters

C300A: 3" drop-point blade. Overall length, 7 1/4". Blade thickness, .100".

C300B: 3" semi-drop-point blade. Overall length, 7 1/4". Blade thickness, .100".

C325: 3 1/4" drop-point blade. Overall length, 7 3/4". Blade thickness, .125".

C375: 3 3/4" semi-drop-point blade. Overall length, 8 1/4". Blade thickness, .125".

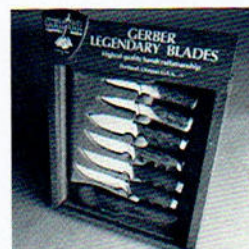

C425: 4 1/4" trailing point blade. Overall length, 8 3/4". Blade thickness, .125".

C475: 4 3/4" drop-point blade. Overall length, 9 1/4". Blade thickness, .125".

Sample Scabbard for the Fixed Blade Knives

Sample Display Case: There's one for the Custom Stag Hunters, the Presentation Series, the Cushiongrip knives and a combination model (shown). Display case dimensions: 19 1/2" wide, 20" high, 2 1/4" deep. Available in a glass-covered countertop model, or in an open, undercounter version.

Gerber Survival Knives.
Left to right: Mark II, Command I and Guardian.

Legends You Can Believe In

GERBER SURVIVAL KNIVES

All Gerber Survival Knives are "hell for stout," with blades of 440-C surgical stainless steel. Every handle is high-tensile cast aluminum, electrostatically coated with a baked epoxy finish that wears like iron. You get a grip that's virtually slip-proof.

The Guardian, Designed by R.W. Loveless: A 3½ ounce double-edged masterpiece by the world's foremost knife designer. The right heft and balance for a reassuring sense of control. Comfortable finger recesses on both the face and sides of the handle. Includes a top-grain leather scabbard with spring release, backed with a special metal boot/belt clip. The Guardian is designed especially for police and military under-cover operations.

Mark I and Mark II: Originated by Gerber. Copied but never equalled. Extra thick double-edged blades for superior strength and durability. The blade of the Mark II has serrated edges near the hilt for heavy cutting.

Command I and Command II: A design concept similar to the Mark I and Mark II, but with a contoured serration on the false edge of the blade, engineered for heavy cutting. On the non-sharpened back of the blade, a flat surface for pounding or hammering. Knives that stand up to the worst conditions on earth.

Survival Knives

The Guardian: 3¾" blade. Overall length, 7¼". Blade thickness, .172". Weight, 3½ oz. Top-grain leather scabbard backed with a special boot/belt clip.

Mark I Survival Knife: 4¾" blade. Overall length, 9". Blade thickness, .250". Included: a leather belt/boot scabbard with quick-release thumb snap.

Mark II Survival Knife: 6¾" blade. Overall length, 12". Blade thickness, .250". Included: leather scabbard with leg-tie thongs. Available with or without 5" Sportsman's Steel.

Command I Survival Knife: 4¾" blade. Overall length, 9". Blade thickness, .250". Included: a leather belt/boot scabbard with quick-release thumb snap.

Command II Survival Knife: 6¾" blade. Overall length, 12". Blade thickness, .250". Included: leather scabbard with leg-tie thongs. Available with or without 5" Sportsman's Steel.

Handcrafted Leather Scabbards: Mk I and Cm I.

Mk II and Cm II.

Mark II and Command II are also available with 5" Sportsman's steel in special combination scabbards.

The Guardian Harness Package

The optional harness package includes a leather scabbard similar to the one that comes standard with the Guardian. Both scabbards have a spring-loaded locking device that keeps the knife securely in place until it's needed. But the scabbard that comes with the harness package has one important difference. Instead of a metal clip, there's a velcro type adhesive that allows you to attach the scabbard to other parts of the harness assembly. Here's how it all works together.

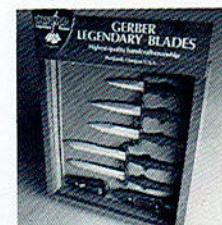

The shoulder harness: You simply attach the adhesive-backed scabbard to the leather platform and slip it onto the shoulder harness, a lightweight nylon strap that anchors the Guardian securely under your arm.

The leg harness: The elastic nylon straps are designed to fit snugly around your lower leg. Attach the special adhesive-backed scabbard and you can keep the Guardian accessible, yet covered by your pant leg.

The leather platform: The adhesive-backed scabbard attaches directly to the platform, a durable rectangle of leather that slips easily onto your belt. It gives you another comfortable but inconspicuous way to wear the Gerber Guardian.

The Survival Knife Display Case: Shows off all Gerber survival knives. Dimensions: 19½" wide, 20" high, 2¼" deep. Available in a glass-covered countertop model, or in an open, undercounter version.

As the manufacturer of survival knives, Gerber Legendary Blades does not assume responsibility for compliance with federal, state or local laws related to ownership or carrying of concealed weapons. Please check the applicable regulations in your area.

Legends In Endurance
**ARMORHIDE® HUNTING
 AND FISHING KNIVES**

Armorhide® Hunting Knives: The blades are of exceedingly hard, M-2 high speed tool steel. Rockwell rating: C60-62 (hard enough to cut other steels). Solid aluminum handles are cast directly on notched tang and coated with textured, firm-gripping Armorhide®, a ground, thermo-setting vinyl.

Armorhide® Fishing Knives: Blades made from 440 surgical stainless steel that resists stains and moisture, even salt water. Gerber's Armorhide® coating is fused onto the aluminum alloy handle for a decidedly unslippery grip. Handles cast directly on notched tang for a rivetless, permanent bond.

Armorhide® Hunting Knives

A-325: 3¼" game and fish blade, ideal for cleaning smaller catches. Overall length, 7½". Blade thickness, .062". Scabbard included.

A-400: 4" drop-point blade, for all purpose hunting, fishing. Overall length, 8½". Blade thickness, .088". Scabbard included.

A-425: 4¼" utility skinning blade, perfect for camping and field dressing chores. Overall length, 8¾". Blade thickness, .100". Scabbard included.

A-450: 4½" general utility blade. Overall length, 9". Blade thickness, .080". Scabbard included.

A-475: 4¾" drop-point blade, designed for large game. Overall length, 9¾". Blade thickness, .100". Scabbard included.

The Shorty: 4½" trailing point blade of high speed tool steel. Overall length, 9¼". Blade thickness, .088". Scabbard included.

The Mini-Magnum: 4" trailing point blade of high speed tool steel. Overall length, 8¾". Blade thickness, .062". Scabbard included.

Combinations Available: Gerber has some really handy combination sets available. In one piggy-back scabbard you can have the following combinations: Shorty with a Pixie. Shorty with 5" Sportsman's Steel. Mini-Magnum with the Pixie. Mini-Magnum with 5" Sportsman's Steel.

Armorhide® Fishing Knives

Pixie: 3" straight back blade of stainless steel for cleaning small game and fish. Overall length, 7". Blade thickness, .050". Scabbard included.

Trout & Bird: 3¼" blade with stripping spoon handle and a special sharpened tip. Overall length, 8". Blade thickness, .050". Scabbard included.

Muskie: 6" blade ideal for boning and filleting all size fish. Overall length, 11¼". Blade thickness, .062". Scabbard included.

Coho: 6" blade with stripping spoon handle. Overall length, 11¾". Blade thickness, .062". Scabbard included.

For the Armorhide® Hunting and Fishing Knives A hand-fitted leather belt scabbard, made in Gerber's own leather shop.

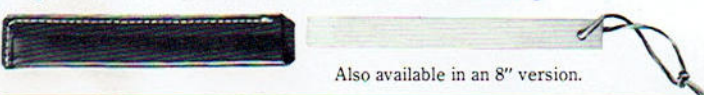

Display cases available for Armorhide hunting and fishing knives.

The Legendary Edge
GERBER SHARPENING TOOLS

The Sportsman's Steel: Steel and chromium carbide fused into a tool so hard, it can sharpen virtually any cutting instrument. Special hardened chisel tip for prying. *Sharpening Stone:* Oil-impregnated, double-sided. One side coarse, the other side medium grit for final honing. *Field Sharpening Kit:* A complete sharpening set, with 5" Sportsman's Steel, whetstone and leather scabbard. *Sharpening Oil:* 4 fluid ounces of highly refined mineral oil.

5" Sportsman's Steel: with conventional belt scabbard and tie thong.

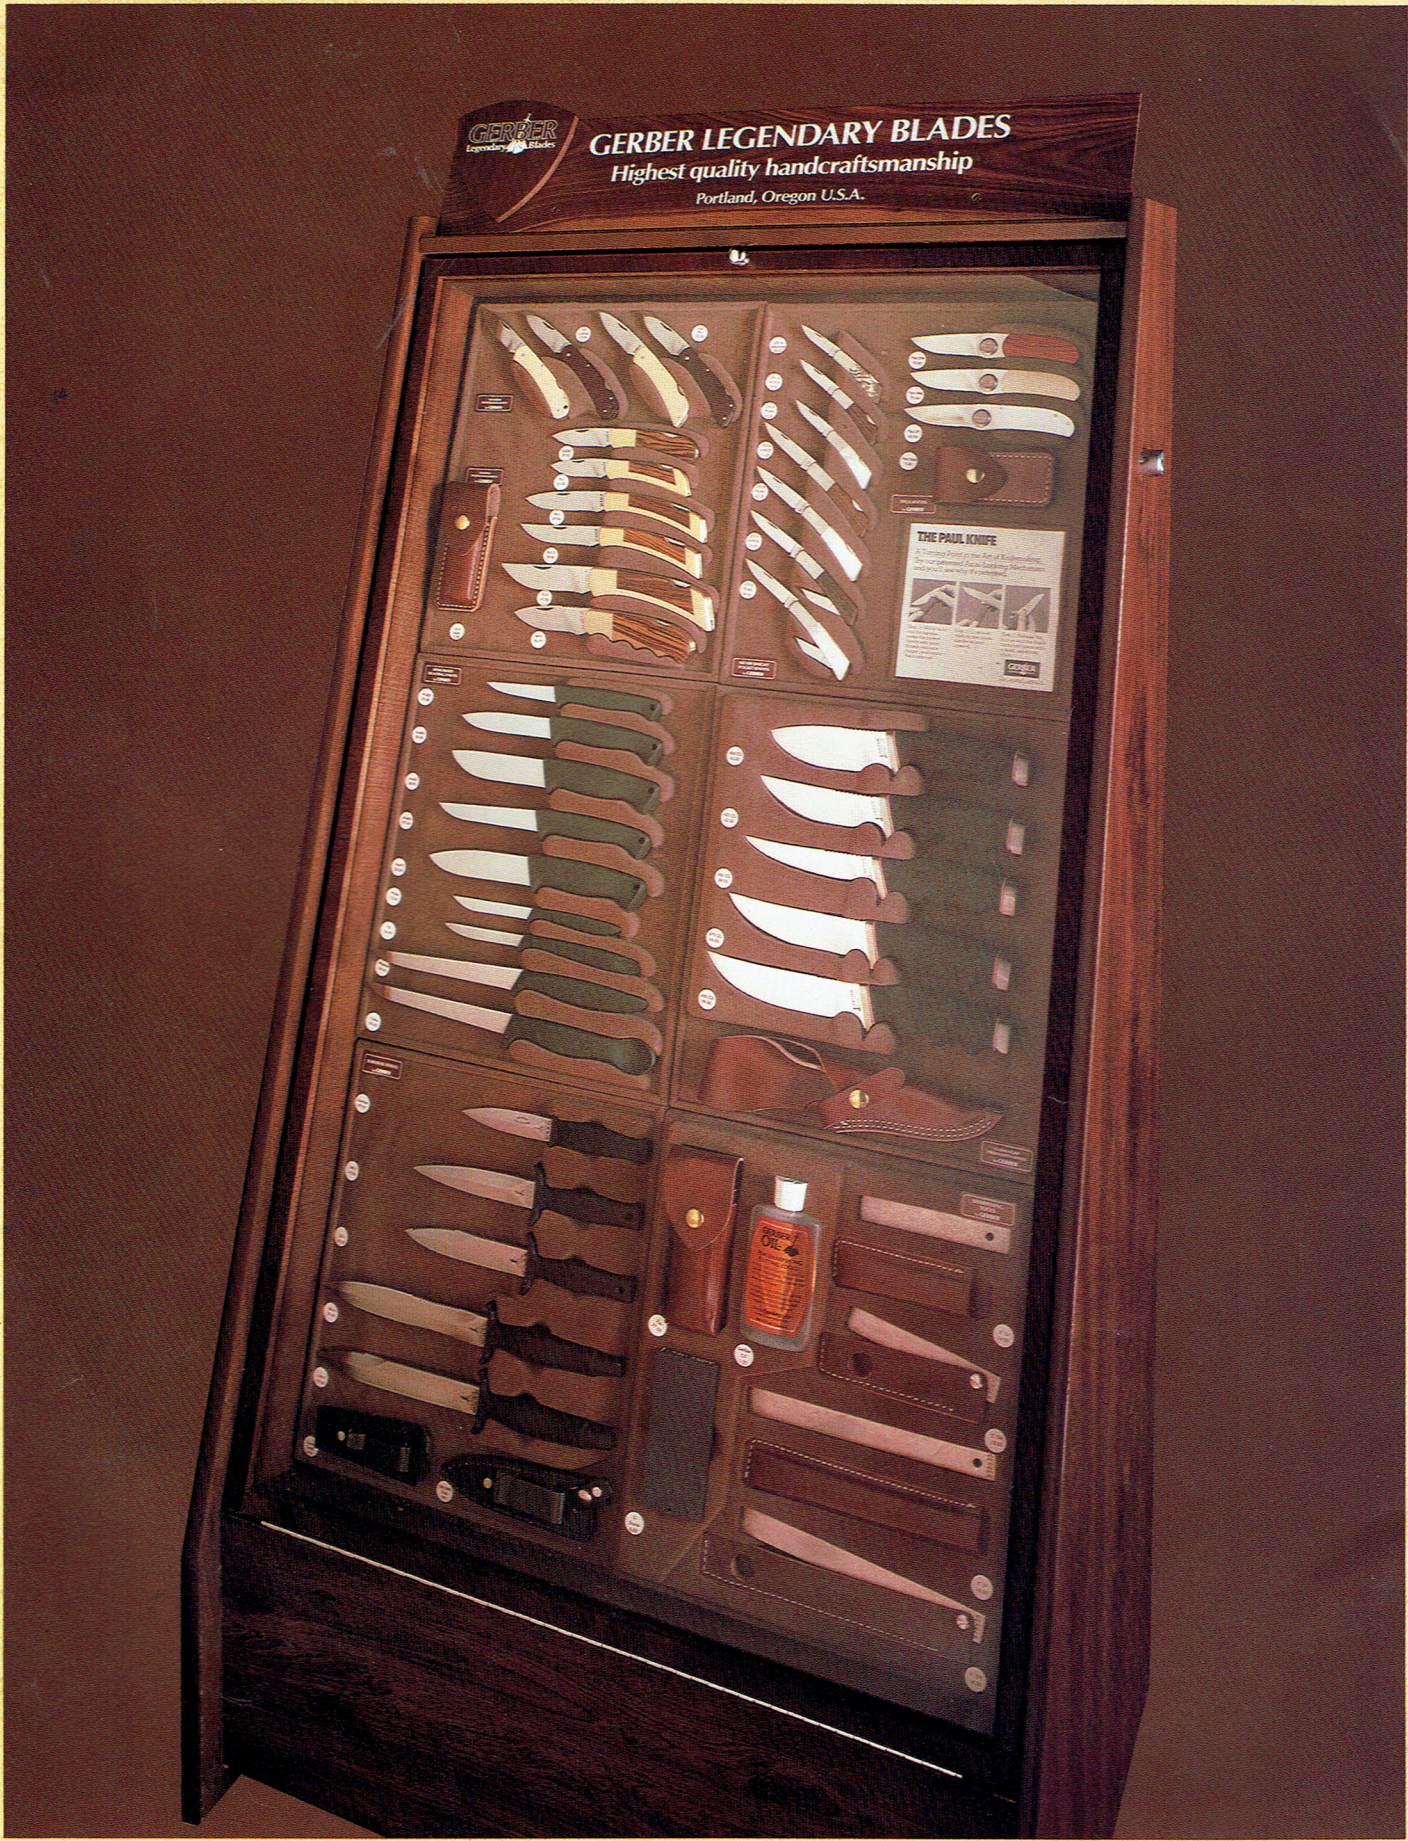

Also available in an 8" version.

5" Sportsman's Steel, Steel folds out to 270°. Leather becomes handle. Tie thong.

Also available in an 8" size.
